RAJAN JAGWANI

Senior QA Engineer | Test Automation & Quality Engineering | 8+ Years

Ahmedabad, India | rajanjagz7@gmail.com | +91 93135 02479 | linkedin.com/in/rajanj71 | rajanjagwani.vercel.app

PROFESSIONAL SUMMARY

ISTQB-certified QA professional with 8+ years of experience across healthcare, e-commerce, and blockchain platforms, with hands-on exposure to Selenium WebDriver/IDE for automation, Postman for API testing, and MySQL/MS SQL Server for backend data validation. Strong background in test strategy, STLC, functional, regression and API testing, defect management (JIRA), and CI/CD-aware release delivery. Experienced working with TestNG, Jenkins, Cucumber, JUnit and Bitbucket, alongside leading QA across concurrent product lines and mentoring engineers on automation and quality best practices.

KEY SKILLS

- **Test Automation & Frameworks:** Selenium WebDriver, Selenium IDE, TestNG, JUnit, Testim, Mabl
- **SQL & Data Validation:** MySQL, MS SQL Server — backend/data validation for functional and regression testing
- **CI/CD & DevOps Tooling:** Jenkins, Git, Bitbucket, Cucumber (BDD), CI/CD-aware automated testing
- **API Testing:** Postman — request/response validation, integration test coverage
- **Test Management & Defects:** JIRA, TestRail, Mantis, Bugzilla, Spira — defect lifecycle, RCA, traceability
- **Cross-Browser/Device QA:** BrowserStack, LambdaTest, Chrome, Firefox, Safari, Edge, Android, iOS
- **Performance Testing:** JMeter, HP LoadRunner
- **QA Leadership:** Test strategy & planning, STLC ownership, UAT & release sign-off, Agile/Scrum delivery, team mentoring

CERTIFICATIONS

- ISTQB Foundation Level (CTFL)
- ISTQB Agile Tester Extension
- AI Testing Fundamentals

PROFESSIONAL EXPERIENCE

QA Team Lead — Software.Co, Ahmedabad *Apr 2025 – Present*

- Own end-to-end QA strategy and execution for multiple concurrent product lines across web, mobile and client-server platforms, covering the full STLC.
- Manage defects and test cycles in JIRA across the team; mentor QA engineers on ISTQB best practices and AI-assisted testing.
- Own UAT sign-off, stakeholder communication and release quality gates.

Senior QA Engineer — Software.Co, Ahmedabad *Dec 2023 – Mar 2025*

- Executed functional, regression and API testing (Postman) across multiple concurrent product lines spanning web, mobile and client-server platforms.
- Used MySQL/MS SQL Server for backend data checks and Selenium-based automation, TestNG, Jenkins, Cucumber and Bitbucket as part of the team's CI/CD-aware testing workflow.

Senior QA Engineer — Techuz InfoWeb Private Limited, Ahmedabad *Nov 2022 – Sep 2023*

- Designed and executed test plans for complex web and mobile applications with functional, regression and integration coverage.
- Validated releases across Web, Mobile, iPad and Client-Server environments; peer-reviewed automation and manual test cases to maintain coverage standards.

- Used AI-assisted workflows to optimize regression suites and improve execution efficiency.

Quality Analyst — Techforce Global, Ahmedabad *Jun 2021 – Sep 2022*

- Used BrowserStack and LambdaTest for cross-browser and cross-device regression testing.
- Tested the Freeway blockchain platform, validating transaction flows, ledger integrity, record immutability and data consistency using SQL-based data checks.
- Designed test cases for distributed-ledger edge cases and supported defect resolution.

Software Tester — eClinicalWorks India Pvt Ltd, Ahmedabad *Feb 2019 – Apr 2021*

- Worked on a Tier-1 EHR platform; owned Registry testing as Registry Module Owner and tested the CRORE module.
- Performed cross-modality validation across Web, Mobile, iPad and Client-Server environments.
- Mentored new team members, peer-reviewed test cases and provided enhancement suggestions to the Project Management team.

Junior Software Tester — Spaceo Technologies, Ahmedabad *Feb 2018 – Feb 2019*

- Performed functional and cross-browser QA across Android, iOS and Web platforms for 20+ applications using Chrome, Firefox, Safari and Edge.
- Performed functional, regression, UI/UX, compatibility and usability testing; created clear defect reports and collaborated with developers to reproduce and resolve issues.

SELECTED PROJECTS

- **HealthMate / Clinic1 / Ozmed (Healthcare Web & Mobile)** — Lead QA: manual, functional, regression and API testing (Postman); JIRA defect management; UAT and release support.
- **eClinicalWorks Registry & CRORE (Tier-1 EHR)** — Registry Module Owner: functional, regression and cross-modality data validation.
- **Freeway Blockchain Platform** — QA: transaction flow, ledger integrity and data consistency testing.
- **NewSunrise E-Commerce** — QA Lead: functional/regression testing of catalog, cart, checkout and payment workflows across browsers.

AWARDS & RECOGNITION

- Employee of the Month — September 2025
- Employee of the Month — October 2025
- Multi Tasker Award — 2026

EDUCATION

Bachelor of Commerce — Gujarat University, Ahmedabad | June 2017
